## Premium Outdoor Warning Siren

**#1 in Durability and Reliability   #1 in Motor Horsepower   #1 in Overall Sound Output   #1 in Affordability**  
**NON ROTATING means NO DELAYS and NO DEAD SPOTS !!!**

- Electro-Mechanical** Warning Siren. No speakers or amplifiers here, just honest, big-time, worry free sound.
- 100% Maintenance Free.** Not just a part of the siren, the whole system !!
- NON-ROTATING.** Forget about the worries of rotating sirens, this unit only has two moving parts !!
- Mechanically** produced sound - stronger and further reaching than electronically produced sound.
- Compatibility,** this siren will integrate seamlessly with 99% of existing siren systems.
- Lifetime Tech Support** is included with every siren. No matter how old your siren is, we will help you through any problems.
- FIVE YEAR WARRANTY** so you can rest assured your siren will be functional at all times.\*\*

---

***Sentry's most popular mid-sized siren is a proven performer. Staged horn projectors help organize sound for even distribution over a large radius. Rated at 115 dB at 100 feet, the Model 10V is an OMNI-DIRECTIONAL siren which produces continuous 360° coverage, making it a superior alternative to a rotating or directional beam siren.***

***The perfect siren for small communities, the 10V is available in either single or three phase power and is a single tone siren, producing 460 cycles per second.***

***All exposed siren components are of metal construction, which are "Powder Coated" for the most durable finish available. The fan and housing are made of non-corrosive cast aluminum.***

***Maximum diameter of the Model 10V shall be 78", maximum height of 56", and maximum mounting base of 19" square. Shipping weight of the siren alone is 325 lbs.***

***Our Most Popular Mid-Sized Siren !!!***
